

Boughton Intensive Green Roof Substrate 1

Product information

Boughton Intensive green roof substrate 1 has been designed to contain a greater proportion of organic matter and finer sand particles. This allows the substrate to retain more moisture for longer periods of time, as well providing extra nutrition for plants.

Application

Designed for intensive green roof installations, this substrate provides a stable growing medium for a wide variety of plants, including green roof lawns, shrubs and trees.

Standard

Boughton Intensive Green Roof Substrate 1 meets and exceeds all present G.R.O guidelines.

Installation details

Boughton Intensive Green Roof Substrate 1 can be laid to depths varying from 100 / 500 cm. The depth of substrate is determined by the planting scheme and the weight loading capability of the roof which must be assessed by a qualified structural engineer.

Delivery info

Boughton Intensive Green Roof Substrate 1 can be delivered in any required format. This includes 25ltr and IBC Bulk bags. Or loose tipped as required.
